

DRUG CLASSIFICATIONS WORKSHEET

	MOA's	Indications	Contraindications	Adverse Effects	Nursing Considerations
Penicillin					
Cephalosporin's					
Nitrofuran					
Sulfonamides					
Fluroquinolines					
Aminoglycosides					
Glycopeptides					
Nitromidazole					
Macrolides					
Tetracycline					
Stimulant					
Bulk Forming					
Emollient					
Saline					
Hyperosmotic					
Insulin (Type 1, 2)					

ANTIBIOTICS

Sulfonylurea					
Biguanide's					
Thiazolidinedione's					
Meglitinides					
Anti-thyroid					
Beta-adrenergic					
Synthetic Levothyroxine					
Corticosteroids					

LAXITIVES

Antitussive					
Decongestant					
AntiHistamine					
Beta-Adrenergic (agonist)					
Anticholinergic					
Corticosteroids					
Xanthine					
AntiLeukotrienes					

DIABETIES

Anticoagulant's					
Anti -Platelet					
Thrombolytic Agent					

RESPIRATORY

THYROID
